Product Information - Phenolic Board

E-mail: phil_con8@yahoo.com

DESCRIPTION

Phenolic Board or Film-faced marine plywood is made of 100% hardwood veneers. It is designed to create phenolic film which is applied and sealed to all four sides to make resistant against moisture. It is tougher and more durable than any conventional plywood, and has smooth surface.

SIZES	COLOR	BONDING STRENGTH
1220 X 2440 X 18 MM <u>3/4 x 4 x 8 (18 mm)</u>	Black with yellow gold print	0.85 MPA
1220 X 2440 X 12 MM <u>1/2 x 4 x 8 (12 mm)</u>	Black with yellow gold print	0.85 MPA

Phenolic Board is an ideal material used for:

Making Furniture and cabinet
Residential Flooring

Industrial Flooring
Bracing
Box-Beams
Portal Frame Gussets

Because of its smooth, grain-free surface, its glossy, its high load-bearing capacity

BENEFITS

Reusable unlike ordinary and lower grade boards
Cost-saving
Durable, workable
Easily installed
Giving consistently smooth, beautiful surface
Eliminating plastering, ready for painting
Resistant against water and corrosion
Time savings because of its smooth surface
Reversible, pre-surfaced on two sides with impregnated phenolic resin film.

Frame system

The door frame looks like door type, so we called it door type or door model frame scaffolding, which is including Main frame, Diagonal/Cross Brace, Horizontal Brace, Walk Board, adjustable jack base etc. Give full play to the role of the framework, stable combination of good performance, and the overall stable structure, easy and fast to assemble and dismantle without any other tools, aerial work more safety, it is an ideal material for construction.
